

Digital Potentiometers

Model: DP-0120

Product:

Technical Details:

Applications:

- ☛ Remote operation of VFDs through potential free switching.
- ☛ Variable Voltage/ Current source.

Features:

- ☛ Lower output values can be factory programmed.
- ☛ Input, Output & Aux. supply Isolation is possible.

Supply Voltage	24 VDC
Output Sources	0-5 VDC/ 0-10 VDC/ 4-20 mA/ 0-20mA
Resolution	12 Bit, 4096 Steps
Output Setting Time	25 micro sec.
Output Time Full Scale	20 sec.
Control Pulse	Potential Free Remote Contacts
Accuracy	Better than $\pm 0.19\%$
Operations	Raise, Lower, Set
Output Drain	15mA
Connections	Rear Side of Container
Indefinite Short circuit protected Output, Unambiguous Raise and Lower Switches.	

Ordering Information:

Model No.	DP-0120
Suffix	05 for 0 to 5 VDC, 010 for 0 to 10 and 0X where X is any other output
