

SQWW-50, Square wire wound potentiometer

Product:

Applications:

- To be used in the Motorized Potentiometer.
- To be used in Joystick.
- For control applications.
- Can be stacked and multiple potentiometers can be used for indication and control.

Electrical Characteristics:

Standard Resistance Values	Refer the Resistance value chart
Power Rating	5W @ 40°C
Linearity	±0.25%
Insulation Resistance	100M! at 500VDC
Max. Working Voltage	250VDC
Electrical Angle of Rotation	300° +10°/-0° or 330° +10°/-0° or 360°
Resistance Tolerance	Standard ±5%, other on request
End Resistance	2! or %Lin. whichever is Greater

Resistance Values:

Standard Resistance values:	100, 130, 200, 500, 1K, 2K, 2K5, 5K, 10K, 20K, 100K (Other values on request)
